GARAMYCIN - gentamicin sulfate  ointment
Fera Pharmaceuticals, LLC

DESCRIPTION:
Gentamicin sulfate is a water soluble antibiotic of the aminoglycoside group. Gentamicin Sulfate Ophthalmic Ointment USP is a sterile ointment for topical ophthalmic use. Each gram contains gentamicin sulfate (equivalent to 3 mg gentamicin) in a base of white petrolatum and mineral oil. Gentamicin is obtained from cultures of Micromonospora purpurea. Gentamicin sulfate is a mixture of the sulfate salts of gentamicin C₁, C₂ and C₁A. All three components appear to have similar antimicrobial activities. Gentamicin sulfate occurs as a white powder and is soluble in water and insoluble in alcohol. The structural formula is as follows:

CLINICAL PHARMACOLOGY:
Microbiology: Gentamicin sulfate is active in vitro against many strains of the following microorganisms:
- Staphylococcus aureus, Staphylococcus epidermidis,
- Streptococcus pyogenes, Streptococcus pneumoniae,
- Enterobacter aerogenes, Escherichia coli, Haemophilus influenzae,
- Klebsiella pneumoniae, Neisseria gonorrhoeae,
- Pseudomonas aeruginosa, and Serratia marcescens.

INDICATIONS AND USAGE:
GARAMYCIN Ophthalmic Ointment is indicated in the topical treatment of ocular bacterial infections, including conjunctivitis, keratitis, keratoconjunctivitis, corneal ulcers, blepharitis, blepharoconjunctivitis, acute meibomianitis, and dacryocystitis caused by susceptible strains of the following microorganisms:
- Staphylococcus aureus, Staphylococcus epidermidis, Streptococcus pyogenes, Streptococcus pneumoniae, Enterobacter aerogenes,
- Escherichia coli, Haemophilus influenzae, Klebsiella pneumoniae, Neisseria gonorrhoeae, Pseudomonas aeruginosa, and Serratia marcescens.

CONTRAINDICATIONS:
GARAMYCIN Ophthalmic Ointment is contraindicated in patients with known hypersensitivity to any of the components.

WARNINGS:
NOT FOR INJECTION INTO THE EYE. Gentamicin Sulfate Ophthalmic Ointment is not for injection. It should never be injected subconjunctivally, nor should it be directly introduced into the anterior chamber of the eye.

PRECAUTIONS
General:
Prolonged use of topical antibiotics may give rise to overgrowth of non-susceptible organisms including fungi. Bacterial resistance to gentamicin may also develop. If purulent discharge, inflammation or pain becomes aggravated, the patient should discontinue use of the medication and consult a physician.
If irritation or hypersensitivity to any component of the drug develops, the patient should discontinue use of this preparation, and appropriate therapy should be instituted.
Ophthalmic ointments may retard corneal healing.

Information For Patients:
To avoid contamination, do not touch tip of container to the eye, eyelid, or any surface.

Carcinogenesis, Mutagenesis and Impairment of Fertility:
There are no published carcinogenicity or impairment of fertility studies on gentamicin. Aminoglycoside antibiotics have been found to be non-mutagenic.

Pregnancy:
Teratogenic effects - Pregnancy Category C. Gentamicin has been shown to depress body weights, kidney weights, and median glomerular counts in newborn rats when administered systemically to pregnant rats in daily doses approximately 500 times the maximum recommended ophthalmic human dose. There are no adequate and well-controlled studies in pregnant women. Gentamicin should be used during pregnancy only if the potential benefit justifies the potential risk to the fetus.
**Pediatric Use:**
Safety and effectiveness in neonates have not been established.

**ADVERSE REACTIONS:**
Bacterial and fungal corneal ulcers have developed during treatment with gentamicin ophthalmic preparations. The most frequently reported adverse reactions are ocular burning and irritation upon drug instillation, non-specific conjunctivitis, conjunctival epithelial defects, and conjunctival hyperemia. Other adverse reactions which have occurred rarely are allergic reactions, thrombocytopenic purpura, and hallucinations.

To report SUSPECTED ADVERSE REACTIONS, contact Fera Pharmaceuticals, LLC at (414) 434-6604, Monday - Friday 9am-5pm EST, or FDA at 1-800-FDA-1088 or www.fda.gov/medwatch.

**DOSAGE AND ADMINISTRATION:**
Apply a small amount (about 1/2 inch) to the affected eye(s) two to three times a day.

**HOW SUPPLIED:**
GARAMYCIN Ophthalmic Ointment (equivalent to 3 mg gentamicin) is supplied as follows:
NDC 48102-009-35 3.5 gram tubes
Store at 25°C (77°F); excursions permitted to 15-30°C (59-86°F)
[see USP Controlled Room Temperature].
GARAMYCIN is a Trademark of Fera Pharmaceuticals, LLC.

**PRINCIPAL DISPLAY PANEL - CARTON**
Usual Dosage:
Apply a small amount (about 1/2 inch) to the
affected eye(s) two to
three times a day. Read
accompanying
directions carefully.

Each gram contains:
Gentamicin Sulfate,
USP equivalent to 3 mg
gentamicin base, in a
base of white
petrolatum and mineral
oil.

Store at 25°C (77°F);
excursions permitted to
15 - 30°C (59 - 86°F)
[see USP Controlled
Room Temperature].
